TECHNICAL SKILLS

Python, Node.js, SQL, Bash, PyTorch, Scikit-learn, Keras, LangChain, LlamaIndex, Azure OpenAI, Microsoft Azure, Databricks, Docker, Kubernetes, Jenkins, Git, Pandas, NumPy, Power BI, Redis, Oracle SQL, React, FastAPI, Flask, REST APIs

EDUCATION

IIT <i>Masters in Artificial Intelligence</i>	Jodhpur, India sep 2025 - present
CDAC <i>Post Graduate Diploma in Artificial Intelligence</i>	Noida, India Aug 2020 - May 2021
APJ Abdul Kalam Technological University <i>B.Tech in Electrical and Electronics Engineering</i>	Kerala, India Aug 2015 - May 2019

PROFESSIONAL EXPERIENCE

Data Consultant I - Data Science <i>Lumen Technologies</i>	Oct 2023 - Present Bangalore, India
- Service Repair AI - Architected and deployed Machine Learning pipeline predicting optimal closure tickets with 94% accuracy, reducing manual resolution time by 85%. Integrated Azure OpenAI GPT-4 for intelligent summary generation, processing 10,000+ daily requests. Built scalable FastAPI microservice deployed on Kubernetes, achieving 99.9% uptime and <200ms response time. Tools used ML Model Optimization Python, Azure OpenAI, Kubernetes, FastAPI, MLOps - Contracts AI - Document Intelligence System, Developed production RAG system processing 50,000+ contract documents using Azure Document Intelligence and GPT-4. Implemented LangChain-based document ingestion pipeline with 98% accuracy in information extraction and LLM powered chat bot interface for user interaction. Designed vector database solution reducing query response time from 30s to 2s. Tools used Python, LangChain, CosmosDB, Azure Document Intelligence - Goals Pro AI - Performance Analytics Platform Built semantic similarity ML model scoring manager-to-IC goal alignment, improving goal quality by 75%. Optimized OpenAI API calls from synchronous to asynchronous batch processing, reducing processing time from 18 hours to 1 hour (95% improvement). Created real-time Power BI dashboards serving 500+ managers with automated alerting system. Tools used Azure Databricks, OpenAI, Power BI, Scikitlearn - Order Summary Bot - Intelligent Automation Engineered LangChain, LLM-powered bot aggregating data from multiple APIs, reducing CCM manual effort by 80%. Processed 25,000+ daily orders with intelligent summarization using GPT-4. Implemented RESTful APIs with comprehensive error handling and monitoring. Tools used Python, LangChain, FastAPI, Azure OpenAI - Adapt AI - Developed and Deployed React based UI for network flow system that shows brief relationship between network devices, Traffic, Lag and usage. Developed multiple visual entries for brief understanding for user including customer location to nearest device and sankey plot. Using tools such as React Vite, networkx, Python	
Software Development Consultant <i>Lumen Technologies</i>	Oct 2022 - Oct 2023 Bangalore, India
Led development of Node.js applications serving 100,000+ daily active users with MongoDB integration. Architected CI/CD pipelines using Jenkins, reducing deployment time by 70%. Implemented comprehensive test suites using Chai, achieving 95% code coverage. Mentored 5 junior developers on best practices for scalable web development	
Information Systems Engineer <i>Lumen Technologies</i>	Oct 2021 - Oct 2022 Bangalore, India
Developed Windows desktop application processing 1M+ records daily with 99.8% accuracy. Created Python automation scripts using selenium python eliminating 100 hours of monthly manual work, saving \$50,000 annually. Built web scrapers and data pipelines handling multiple data sources with robust error handling. Designed interactive Power BI dashboards with real-time monitoring for 200+ stakeholders	
AI Engineer Intern <i>FactiveMinds</i>	Feb 2021 - Mar 2021 Trivandrum, India
Developed speech recognition models using deep learning architectures achieving 92% accuracy. Implemented OpenCV-based computer vision solutions for image processing workflows
